

Course Objectives

At the conclusion of the Oncology Sessions course, the successful learner will be able to:

Hematologic Malignancies

- Understand the most recent advances in the pharmacology and toxicology of anti-neoplastic drugs
- Be familiar with the diagnosis, evaluation, and management of hematologic malignancies
- Identify strategies for taking the board examinations

Oncology

- Understand the epidemiology of malignant diseases and management of the medical complications of malignancy
- Understand the principles of management of gynecologic and other genito-urinary malignancies
- Recognize the latest advances in cancers of the lung, the breast, and the gastrointestinal tract
- Recognize principles of new developments in biologic therapy of cancer
- Contend with complexity of HIV related malignancies

GW
